Furniture collection 2025

Design is  
not just looks.

Design is  
how it works.

# Our story

Cinas was founded under the name Carl J. Nielsen in 1903.

Since the 1980s, the company has developed into the design, import and distribution company that we see today.

All of our products are made with carefully selected manufacturers in the Far East, where the cooperation has functioned for generations. High-quality requirements are incorporated into this network, ensuring that our products always live up to our quality and finishing standards.

We focus on furniture and accessories that emphasize their simplicity and functional expression, but still with a stylish edge with our design philosophy in mind.

“A design is incomplete until someone uses it.”

# INDOOR

Our indoor collection is known for combining innovative materials and commercial designs. All products are designed to fit into every contemporary setting.

The collection consists of a wide range of commodities from durable carbonized bamboo to painted mahogany, teakwood and eco-friendly recycled polyester.

The collection balances a strong focus on environmental concerns with Scandinavian aesthetics. Results from this comes alive in this 2025 indoor collection which favors function, comfort, CSR and style.

Even though Cinas was founded more than 100 years ago, we still aim at keeping the standards high and the prices affordable with a high emphasis on reliability. That's the Cinas DNA.

# BAMBOO

Bamboo has gained significant attention as a preferred material for furniture due to its unique properties and sustainability benefits. Recognized as the fastest-growing plant on Earth, bamboo matures and becomes harvest-ready in a remarkably short period, typically around four years. This rapid growth rate means that bamboo can be replenished quickly, making it a renewable and eco-friendly resource.

Furthermore, bamboo possesses inherent strength and durability, making it suitable for crafting various types of furniture, from chairs and tables to beds and cabinets. Its natural grain patterns and aesthetic appeal add a touch of elegance and warmth to interior spaces.

Another compelling advantage of bamboo as a furniture material is its environmental footprint. Throughout its lifecycle, bamboo exhibits CO<sub>2</sub> neutrality, meaning it absorbs as much carbon dioxide as it releases, making it a carbon-neutral resource.

Bamboo stands out as a versatile, durable, and environmentally friendly material choice for furniture, aligning with the growing demand for sustainable solutions.

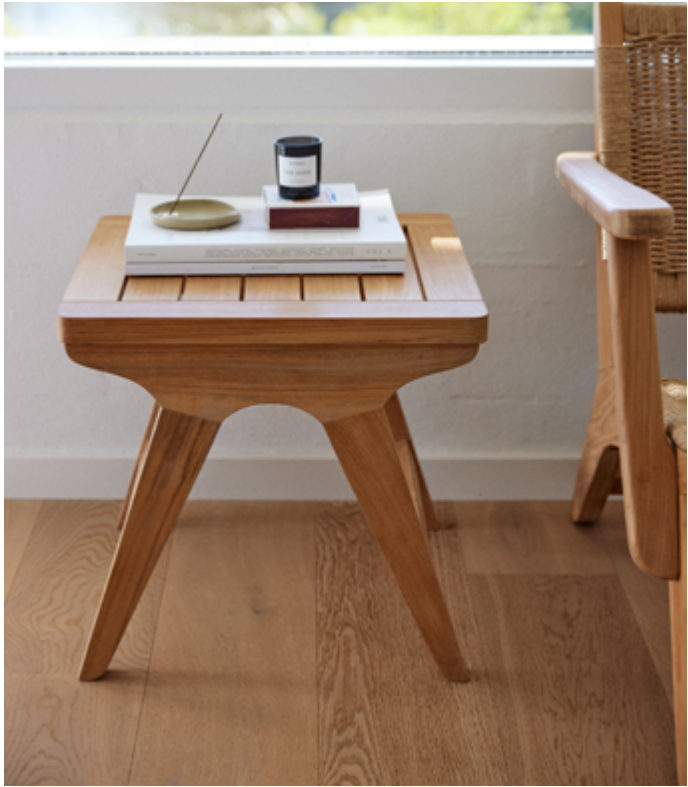

# EYA

The Eya lounge chair combines timeless design with practical functionality and is made from teak and paperloom rope. The frame of the chair is crafted from solid teak wood, known for its durability.

# NOBLE

This curated collection presents tables, chairs, and wardrobe solutions, each meticulously designed to blend aesthetic charm with functional design. Whether you're furnishing a modern living space, dining area, or bedroom, the serie offers a seamless fusion of style and utility.

Black-Painted Nesting table alongside the sophisticated black Safari chair. This pairing exemplifies modern elegance with a nod to classic design. The nesting table, meticulously crafted from bamboo and finished in a deep black tone, offers both versatility and style for contemporary interiors. Paired alongside, the black Safari chair stands out with its sleek lines, supple leather, and timeless appeal. Together, they create an inviting and luxurious ambiance, marrying functionality with a statement-making aesthetic. Elevate your living or lounge space with this distinctive combination, where each piece complements the other in a dance of design and comfort.

Unveil a blend of scandsinavian design with urban sophistication with our Nesting Table in bamboo paired with the Safari Chair in brown leather.

This pairing not only captures attention but also invites relaxation and conversation. Dive into a space where natural elements meet refined craftsmanship.

The bamboo's natural grain and texture lend a touch of sophistication, making it a versatile centerpiece for any entryway or living space.

This chair captures the essence of safari-inspired elegance, offering both comfort and sophistication in its form. The canvas upholstery provides a rugged yet refined texture, complemented by the chair's sturdy frame, making it a versatile addition to any setting.

# CLASSIC

This collection seamlessly combines storage boxes and tables crafted in two elegant materials: teak, known for its natural beauty and durability, and painted mahogany, adding a refined and classic touch. Achieve a harmonious fusion of style and functionality, enriching any space with elegance and charm.

The Storage Collection combines functionality and aesthetics seamlessly. Each box is meticulously handcrafted with attention to detail and the use of high-quality materials. Whether you choose teak wood or mahogany, you will experience the natural beauty and warmth of the wood, adding a touch of elegance to your home. Their clean lines and timeless design make them suitable for any interior style, effortlessly blending into both modern and classic home environments.

Introducing our tray table crafted in teak and painted mahogany which is a blend of elegance and functionality. This table not only exudes timeless charm with its rich teak and mahogany finishes but also offers versatility with its removable tray. Whether you are serving drinks or displaying decorative items, the detachable tray adds convenience, making it both a stylish and practical addition to any space. Experience the perfect marriage of aesthetic appeal and functionality with this exquisite tray table.

Classic side table crafted in teak is a versatile addition to any setting. Designed with both style and durability in mind, this side table seamlessly transitions from indoor elegance to outdoor functionality during the summer months.

Whether accentuating your interior space or enhancing your outdoor setting, its teak construction ensures resilience and timeless appeal. Experience the perfect balance of sophistication and versatility with this Classic side table, designed to complement any environment year-round.

# OUR MATERIALS

## PAPERLOOM

Paperloom is an innovative and sustainable material crafted by wrapping durable kraft paper around metal wire and weaving it into intricate patterns.

The result is a lightweight yet exceptionally strong material with a natural and elegant aesthetic. This unique combination of strength and texture gives Paperloom furniture its distinctive appeal, perfectly blending modern functionality with timeless design.

Renowned for its flexibility, Paperloom is ideal for creating finely woven surfaces that add a soft, inviting touch to any indoor space. Its eco-friendly nature, derived from recyclable paper fibers, makes it an excellent choice for sustainable interiors. The material is also easy to maintain, retaining its color and structure for years.

## MAO ZHU, BAMBOO, CHINA

Bamboo grows extremely fast and is ready to harvest in 4-6 years. Bamboo regenerates itself from its existing root system and is one of the fastest growing plants on earth.

Giving 25 times more wood per hectare per year than traditional hardwood forests, it is an extremely sustainable material, and our natural choice for furniture.

Fresh bamboo has a yellowish natural color, however, the bamboo we use for our furniture has gone through a steaming process (carbonizing) to gain the warm glow similar to untreated oak or teakwood.

### **Vertical carbonized bamboo**

We have developed vertical carbonized bamboo production for use in our furniture. The vertical bamboo strips are glued and pressed together giving a slim and straight-line pattern with subdued bamboo shoot visible at the surface.

## MAHOGANY AND TEAKWOOD

There are good reasons for selecting products made from wood. As well as being a beautiful, vibrant and natural material that feels good to touch, wood is a renewable resource. Unlike many other materials based on oil, coal or metals, wood is sustainable, recyclable, and decomposes naturally. From the perspective of climate control, our willingness and determination to manage forest resources is crucial, and consumers and producers need to know whether a piece of timber has sustainable origins.

Certification systems backed by the EU and responsible timber producing countries document the path from forest to consumer, and Cinas has a firm policy in this regard. All of our timber and finished wood products are procured from producers covered by the two.
