MUZE ARMCHAIR
GREY TEXTELINE / ANTHRACITE FRAME
68W x 75D x 28H

MATERIALS

ALUMINIUM

Aluminium is a lightweight metal that is very strong and durable. The alloy we use guarantees excellent resistance to corrosion and has outstanding material properties. All aluminium products in the OASIQ collection are polished by hand, which produces a very beautiful finish when painted. After polishing, the furniture is cleaned, chemically treated and painted using an electro-statically applied polyester powder coating. This gives the furniture a very strong finish, making it scratch resistant and weatherproof.

TEAK

Teak is a beautiful dense hardwood with a uniquely high natural oil content. This means that it easily withstands all kinds of weather conditions. Even without any form of protection, sun, rain and snow do not diminish the quality of this natural material. Our teak furniture is delivered to the customer untreated. Under the influence of weather conditions, teak furniture will slowly change colour to a silvery grey that perfectly matches its natural surroundings. In order to prevent dirt and stains settling into the pores of the wood, we recommend regular cleaning. After a while, teak furniture might develop fine cracks in the end-grain parts, such as legs and arms. This is nothing to worry about. It is a natural process of the wood that will disappear with the natural changes in the weather and the consequent change in the moisture content of the wood.

ROPE

All rope used in OASIQ woven furniture is manufactured from a combination of high performance Textilene® and solution-dyed Diversatex® Olefin outdoor yarns. This rope is tough and durable, yet soft and supple. As the yarns are dyed all the way through and have excellent UV-resistant properties, these ropes will remain colourfast for many years and will withstand the rigours of outdoor use with style and elegance.

STAINLESS STEEL

All stainless steel products in the OASIQ collection are made of Grade 304 stainless steel. This metal consists of various alloy elements such as iron, nickel and chromium. When exposed to air, a hard chromium-oxide layer is formed that protects the metal against corrosion. Our stainless steel products have been hand brushed to give their surface a satin-like shine that feels very smooth. The result is a corrosion resistant surface that is easy to clean and maintain.

HPL

HPL (high pressure laminate) is a flat panel, based on thermosetting resins and wood-based fibres. These panels are manufactured under high pressure and at high temperatures. This process ensures that the resins in the core layers of the panel and on the surface bind with each other. The result is a homogenous panel of high density. More info on page 39.

CERAMIC

A ceramic material is an inorganic, non-metallic, often crystalline oxide, nitride or carbide material. Ceramic materials are brittle, hard, strong in compression, weak in shearing and tension. They withstand chemical erosion that occurs in other materials subjected to acidic or caustic environments. More info on page 39.

CERAMIC

Our ceramic tops are durable and stain-resistant and they offer an exquisitely sophisticated natural look.

The ceramic tops are available for our MACHAR - SERAC - ATTOL tables.

White ceramic

Grey ceramic

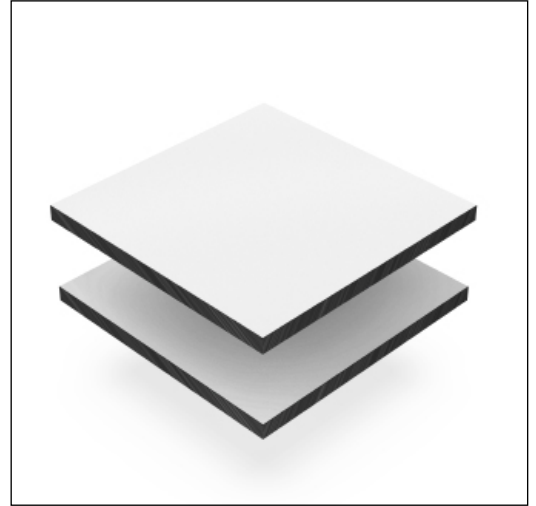

Anthracite ceramic

HPL

Our HPL tops are made of TRESPA® high pressured laminated panels with a very high density.

The HPL tops are available for our MACHAR - REEF - SERAC - CERU tables.

White HPL

Black HPL

Nordic Black HPL

FABRICS SUNBRELLA

Cushions & fabrics

OASIQ cushions are covered with Sunbrella or Dolan fabrics. These fabrics have been especially developed for outdoor use and are made of solution dyed yarns. This unique colouring process guarantees optimal UV-resistance and durability. Most of the covers can be removed for cleaning. In case the cover cannot be removed the cushion can be washed completely. The fabrics have also been treated with a water repellent Teflon layer.

Weatherproof cushions

The foam cores of these cushions are made of a special weatherproof foam called QuickDry Foam. This is a cutting edge, high performance foam designed specifically for outdoor cushions. Manufactured from carefully selected high grade material, QuikDry has extreme durability and strength.

Its unique porous open cell structure allows water to drain very rapidly and fresh air to circulate freely.

The cushions for Riad and Yland LX are also weatherproof but do not have QuickDry foam. For these cushions we use regular high density foam over which we have a waterproof cover. On top of that comes the water repellent fabric cover which makes these cushions also weatherproof.

Non weatherproof cushions

For our regular cushions we use regular high density foam over which there is a fabric cover.

Please note that it is also possible to order different Sunbrella fabrics for all our collections.

Let us know the Sunbrella type number and we will check price and delivery time.

FABRICS DOLAN

Washing

Most cushions have a zipper so that the cover can be removed and washed. In case the cushion has no zipper the complete cushion can be washed.

For washing we recommend a woll washing program and a temperature of max. 30 degrees.

DOLAN Vintage cushions

Our Vintage decoration pillows are made of DOLAN yarn. This is an acrylic fiber which has been used for outdoor for more than 25 years. DOLAN has also a very good weatherproof resistance and very high colour fastness. This fabric has been used for many years for convertible car tops.
